DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I-IV. Claims 1-13, drawn to a transgenic seed having in its genome a DNA which expresses a transcription factor comprising the consensus amino acid sequence of SEQ ID NO: 11 and at least 50 contiguous amino acids of SEQ ID NO: 1, 2 or 3, or at least 50% identical to SEQ ID NO: 12, classified in class 800, subclass 278, for example.

The inventions are distinct, each from the other because of the following reasons:

2. A DNA which expresses a transcription factor comprising the consensus amino acid sequence of SEQ ID NO: 11 is considered generic to all of the inventions, the at least 50 contiguous amino acids of SEQ ID NO: 1, 2 or 3, or at least 50% identical to SEQ ID NO: 12 is considered distinguishing characteristics and thus separate inventions within the meaning of 35 USC 1.121. This is because the at least 50 contiguous amino acids of SEQ ID NO: 1, 2 or 3, or at least 50% identical to SEQ ID NO: 12 does not specifically encompass the consensus amino acid sequence of SEQ ID NO: 11, and thus each would require a separate search of the art.

Inventions I-IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In

Art Unit: 1638

the instant case, the combination as claimed does not require the particulars of the subcombination as claimed for the reasons given above. The subcombination has separate utility because the different transcription factor encoding DNAs would produce different traits in the claimed transgenic seed.

The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

3. Applicant is advised that the reply to this requirement to be complete within one month (not less than 30 days) must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
